### Uniden introduces new DIY home security products exclusive to Bunnings

Uniden has announced it is introducing two new home security cameras, exclusive to Bunnings Warehouse. A new cloud based, 2K Super HD, home security camera called the **App Cam HOME** provides quality vision indoors, while the **App Cam Solo PRO (black)**, is a 100% wirefree, rechargeable, solar power compatible, spotlight and security camera in-one to keep watch over the outdoors.

*Uniden App Cam HOME*

With a new and contemporary design, the App Cam HOME can be placed in any room and is ideal for open plan living areas. With a 355-degree pan and 50-degree tilt rotation, the camera provides greater flexibility and a wider viewing area when positioned around the home.

The App Cam HOME is easy to set up and simply plugs in to power and connects to the dual band WiFi (2.4GHz / 5GHz) for a reliable and continuous connection. The 2K (4MP) Super HD resolution allows users to record and view footage with exceptional clarity, securely accessed from anywhere in the world via the dedicated Uniden Solo app. Multiple devices can be used throughout the home, upstairs and downstairs, and centrally viewed and controlled via a smart device.

*Uniden App Cam Solo PRO*

Designed for Australian homes and weather conditions, the App Cam Solo PRO in a sleek black design, exclusive to Bunnings, can withstand exposure to the elements to capture footage with a 120-degree wide viewing angle. Perfect for positioning at a front or rear entrance, or fixed to a garage, the addition of the built-in spotlight allows users to better see the appearance of anyone approaching the property, while also acting as an effective deterrent to unwanted visitors.

The Full HD 1080p resolution delivers exceptional clarity. The Starlight CMOS sensor, together with the built-in spotlight, adds colour to the night vision footage up to 10 metres away to ensure a high-quality image. The optional Uniden Solar Panel, available from Uniden, can be used alongside the camera, positioned for optimal sunlight exposure. The solar panel recharges the App Cam Solo PRO, while providing non-stop power during daylight hours, allowing footage to be recorded and viewed without the risk of draining the battery.

Both the Uniden App Cam HOME and App Cam Solo PRO are app-enabled and can be operated remotely using a smartphone or tablet to change the viewing angle, delivering more coverage than a static lens camera. The cameras feature pre-motion recording, capturing footage four seconds before motion is detected so the entire incident is recorded. They are also compatible with Google Assistant and Alexa, so users can conveniently view footage and operate the camera using voice control.

Additional features, such as Two Way Talk functionality, enable real-time conversations with family – or pets – while at work or away for extended periods. Footage can be stored directly to SD card or the Uniden Cloud ensuring important moments are captured and available to replay when required. Both cameras also have privacy masking to black out areas within the camera's view that users do not want recorded.

Importantly, Uniden offers seven days of free rolling cloud backup for the lifetime of these products, so there are no hidden costs with subscriptions.

**Uniden Guardian App Cam HOME key features:**

- 2K (4MP) Super HD resolution
- 355-degree pan and 50-degree tilt
- DUAL-BAND WIFI 2.4/5 GHz WiFi
