<u>Steps to update the F/W:</u>

1)    Unzip the attachment and copy the root file (.bin) on to a *formatted* micro SD card.

2)    Ensuring that the unit is turned off, insert the micro SD card into the given slot and then turn on the unit.

3)    The LCD will display *"processing",* and once the firmware has been updated, the unit will shut down.

4)    Take out the micro SD card and press the Reset button with a blunt object to restart the unit.

5)    Go to the Menu setting and choose 'Default Settings'. Select 'Yes' to reset and 'Yes' again to reboot the unit.

*<u>To know that your firmware update has been successful</u>*:
Check the firmware version, it should now be: V0.1.8 G82CK
